Class: The Figure: Inner Mechanics, Outer Form

Date/Time: _____

Instructor: Christopher Davison

This is a class for all skill levels that will increase your mastery of the human figure - no matter where you are starting from. We will look at three different ways of dealing with the figure: 1) Basic underlying skeletal anatomy 2) Basic building blocks and proportions 3) A drawing technique known as intercross to increase our life-drawing accuracy. While life-drawing is our focus, we will also need to spend time drawing the figure from imagination so we can build a mental model of the figure for future reference in various life-drawing scenarios. If you are up for the challenge of an exacting and rigorous figure drawing experience, I can guarantee that whatever skill level you enter the class with, you will leave it on higher ground. This class is for all ages and abilities. Each class is 3 hours in duration.
